

SafeDoor

NORIX™

Anti-Ligature

SafeDoor from Norix Furniture provides a balance of safety and privacy in demanding environments. This unique door design hangs with magnetic nylon hinges that attach to metal door frames but collapse with just 20 pounds of force mitigating ligature risk. The high-quality vinyl material is RF welded over high-density polyurethane foam to withstand abuse. SafeDoor is chemically resistant to body fluids and easy to clean. Made in the U.S.A.
